ATI-RTC 02, City Agriculturist Mr. Moises Alamo and representatives from CLGU Ilagan graced the productive cropping season through the conduct of Field Day of High Yield Corn Varieties and the graduation of 47 farmers attending the farm school for 16 weeks.

The Field Day was also held to showcase the top corn varieties and performances of different bio-fertilizer products to corn adapting technology protocols. Yield per hectare was based on crop cut at dry basis (14% MC) and its conduct was led by OPA-Corn Team, Seed, Bio-fertilizer & Agricultural Lime companies, CLGU Ilagan, cooperators and officials of Barangay Baculud.

Moreover, the Isabela Provincial Corn Derby Project was made possible with the cooperation of private companies, City Government of Ilagan, Brgy. Councils and the farmer-cooperators of Baculud.

b. Collaborative Techno-Demonstration cum Farmers' Field School.

Collaborative project between P/MLGU San Mateo, BFAR PFO Isabela and PGI-OPA at Brgy. Victoria, San Mateo, Isabela.

**Launching of the Collaborative Techno-Demonstration cum Farmers' Field School.**

The establishment of the project aims to showcase the Technology Demonstration in Semi-Intensive Polyculture System (*tilapia and ulang at the rate of 60%-40% respectively*) in Freshwater Fishponds coupled with lectures and hands-on training designed on a half-day session twice (2x) a month and a whole day session (*when needed*).

The establishment of demonstration farm will serve as observation and learning sites of the participants during the four (4) months culture duration.

Twenty-five (25) fisherfolk participants were selected as participants of the season-long training. The selected participants will be provided with snacks during the conduct of the said training (PGI-OPA counterpart).

Agricultural inputs such as feeds and fingerlings will be provided by BFAR while training materials and other supplies will be provided by the MLGU of San Mateo, Isabela.

c. Pond Based Semi-Intensive Polyculture Technology Demonstration Project cum Fisherfolk Field School (FFS)

The project aims to showcase the technology of polyculture and semi-intensive culture of different aquaculture species in ponds to attain an increase in production and source of livelihood and income for fisherfolks.
